

JOB TITLE: IT DevOps Manager**LOCATION: UniOps Bangalore****ABOUT UNILEVER:**

Be part of the world's most successful, purpose-led business. Work with brands that are well-loved around the world, that improve the lives of our consumers and the communities around us. We promote innovation, big and small, to make our business win and grow; and we believe in business as a force for good. Unleash your curiosity, challenge ideas and disrupt processes; use your energy to make this happen. Our brilliant business leaders and colleagues provide mentorship and inspiration, so you can be at your best. Every day, nine out of ten Indian households use our products to feel good, look good and get more out of life – giving us a unique opportunity to build a brighter future.

Every individual here can bring their purpose to life through their work. Join us and you'll be surrounded by inspiring leaders and supportive peers. Among them, you'll channel your purpose, bring fresh ideas to the table, and simply be you. As you work to make a real impact on the business and the world, we'll work to help you become a better you.

ABOUT UNIOPS:

Unilever Operations (UniOps) is the global technology and operations engine of Unilever offering business services, technology, and enterprise solutions. UniOps serves over 190 locations and through a network of specialized service lines and partners delivers insights and innovations, user experiences and end-to-end seamless delivery making Unilever Purpose Led and Future Fit.

MAIN JOB PURPOSE:

Datalab is a leading edge Data Science Platform used by Unilever R&D expert & non expert community. The platform is built on MS Azure using the most currently available technology stack.

Datalab is used by R&D to turn data into valuable insights which help R&D innovate faster and cheaper through use of data science tools and computational models.

Safety Environment Assurance Center (SEAC) is a global function of R&D and tasked with protecting Consumers, Workers & our Environment by ensuring Unilever's Products & Processes are Safe & Sustainable by Design

We are looking for an experienced team lead who will be part of the Uniops PLM platform team located in the Uniops Office in Bangalore. The person will be responsible to manage all DevOps aspects of the current/new innovation/development and data transformation activities related to the R&D on the Datalab platform & SEAC.

In addition the person will take on responsibilities to support Unilever teams on Data & Integration aspects between the R&D systems

KEY ACCOUNTABILITIES:

- Manage a team consisting of a mix of internal and contract members to deliver projects using waterfall/agile project delivery methods.
- Working with Product Owners and service delivery teams to land new capabilities.
- Work closely with Unilever/R&D architecture teams and steering groups to decide on right technology and ensure that solutions are developed as per Unilever guidelines
- Translate user requirements / user stories into designs and cost estimates.
- Ensure solutions developed are in conformity to Unilever Info Security Standards
- Regular review with support teams and spot opportunities for improvements and simplification.
- Manage team resources and budget.

KEY REQUIREMENTS:

- Knowledge of the latest trends in IT DevOps.
- Knowledge of atleast 1 development language/platform, Azure technologies, Pega
- Fluent in written and spoken English.
- Strong planning and organisational skills.
- Ability to manage and lead teams in a cross functional structure.
- Flexible, proactive, naturally curious and collaborative, not afraid to step up and share your knowledge

- Strong eye for detail.
- The ability to thrive under pressure and meet deadlines and objectives, with a results-oriented and self-starter mentality
