ABOUT UNIOPS:

Unilever Operations (UniOps) is the global technology and operations engine of Unilever offering business services, technology, and enterprise solutions. UniOps serves over 190 locations and through a network of specialized service lines and partners delivers insights and innovations, user experiences and end-to-end seamless delivery making Unilever Purpose Led and Future Fit.

MAIN JOB PURPOSE:

In Supply Chain IT - Innovation is at the heart of our ambition to grow sustainably. And technology is central in supply chain plans to deliver outstanding products and experiences. We are technology powerhouse that innovates and digitally transforms Logistics – Transportation function. We are a truly global team enabling millions of customer orders and shipments across the globe while having a positive impact on the environment and society. Our influence for change is greatest where we have the clearest line of sight throughout the whole supply chain. That's where we are focusing, and you could be pushing us to find new ways to carry on increasing our efficiency, transparency and allow for a more sustainable delivery of our products. While you will work on latest technologies available in market, you will also acquire outstanding domain & cross functional knowledge by business partnering.

Join us if you want to be part of a diverse and ambitious team shaping the future of Transportation with exciting career opportunities in a global, purpose led business.

KEY ACCOUNTABILITIES:

Develop a deep understanding of the Unilever supply chain vision and evolving business requirements. Work together with business leaders, regional teams and translate those needs into technology programs. Establish yourself as the first point of contact for all matters relevant to the Transportation – IT agenda for markets teams. Lead the delivery of innovation roadmap for market(s), manage BAU enhancements and application support.

Design and own technical solutions developed in transportation domain

Lead the team of 3rd -party technical personnel working on transportation applications to optimize technical capabilities and requirements as well as guarantee successful delivery of projects.

Proactively monitor processes to identify trends; analyses/predicts trends and develops a long-range plan designed to resolve problems and prevent them from recurring to ensure high service levels.

Work with a 'Glocal' (Global + Local) mindset – while addressing local requirements from market, also help in driving Application convergence within the Function, from Local -> Regional -> Global.

Understand and interpret IT strategic architecture, helping ensure all projects and application support follow the principles, guidelines, and standards.

Managing the budget and timeline of projects

KEY REQUIREMENTS:

We are looking for people with functional knowledge in Logistics and experience of working in large scale IT Projects.

Minimum qualification of bachelor's degree in engineering/Science or similar degree along with 5 to 8 years of IT experience, including implementation of Oracle Transportation Management. Master's degree in management will be a plus.

Basic understanding of supply chain with in depth knowledge of logistics area (specifically transportation).

Technical knowledge of any transportation tool will be an add on advantage.

Broad knowledge and experience with various ERP systems..Working knowledge of transportation technical ecosystem including SAP, track & trace, carrier systems etc.

Broad understanding of SaaS and Cloud principles.

Strong stakeholder management skills – will have to work directly with markets across multiple geographies

Excellent communication and presentation skills to lead discussions with technical as well as non-technical audiences

Ability to work in multidisciplinary and multi-cultural teams including external product teams

Ability to lead a team of vendor partners

Creative problem-solving mindset with a bias for practical solutions. A quick learner, not afraid to take the initiative and be proactive to get things done

Knowledge of project lifecycle and its different methodologies

Knowledge and understanding of driving change management with end users

Main associated technologies – Oracle Transportation Management (OTM), Track & Trace

Main associated functional areas – Transportation Management, Shipment Planning & Execution, Freight Cost Management

At HUL, we believe that every individual irrespective of their race, colour, religion, gender, sexual orientation, gender identity or expression, age, nationality, caste, disability or marital status can bring their purpose to life. So apply to us, to unleash your curiosity, challenge ideas and disrupt processes; use your energy to make the world a better place. As you work to make a real impact on the business and the world, we'll work to help you become a better you!
