Our brilliant business leaders and colleagues provide mentorship and inspiration, so you can be at your best. Every day, nine out of ten Indian households use our products to feel good, look good and get more out of life - giving us a unique opportunity to build a brighter future.

Every individual here can bring their purpose to life through their work. Join us and you'll be surrounded by inspiring leaders and supportive peers. Among them, you'll channel your purpose, bring fresh ideas to the table, and simply be you. As you work to make a real impact on the business and the world, we'll work to help you become a better you.

ABOUT UNIOPS:

Unilever Operations (UniOps) is the global technology and operations engine of Unilever offering business services, technology, and enterprise solutions. UniOps serves over 190 locations and through a network of specialized service lines and partners delivers insights and innovations, user experiences and end-to-end seamless delivery making Unilever Purpose Led and Future Fit.

MAIN JOB PURPOSE:

Data Lake Delivery Manager will manage the technical delivery of critical data ingestion which powers analytics for our business. The delivery manager will manage the full life cycle of solution delivery, including stakeholder management, communication and addressing dependencies with other IT teams.

KEY ACCOUNTABILITIES:

- Manage work related to the delivery of new or changes in data objects in the data lake, across several business functions.
- Provide guidance using Agile delivery methods for design, build, test, and deployment.
- Work with the project team members to break requirements into sprints and plan sprint delivery.
- Manage dependencies with other teams, manage risks and issues, and resolve them in good time.
- Manage and collaborate with supplier teams and supplier guide, as per contracted service to optimise outcomes for Unilever users of the data lake.
- Ensure third-party/ internal Unilever resources are in place to deliver planned sprints.
- Coordinate with other Data & Analytics teams to ensure business, functional & technical requirements are developed in a timely fashion.
- Work with other team members within the UDL/BDL Factory to ensure that delivery work is understood in advance, planned well and delivered on time, in full.

KEY REQUIREMENTS:

- o 10+ years of experience in Solutions delivery, with recent experience in data & analytics.
- o Extensive experience in delivering large-scale Data projects using Sprint delivery or Kanban delivery.
- o Technical knowledge of cloud platforms and data and analytics tools and technologies, preferably MS Azure-hosted Data Lake Solutions.
- o Knowledge and experience in various aspects of IT solution delivery, such as architecture, security, quality, capacity, application development and testing, and live support.
- o Experience working in a global organisation with large teams, vendors

and stakeholders.

- o Self-motivated problem solver; able to thrive in a dynamic and result environment.
- o Excellent verbal, written, and interpersonal communication skills.
- o Makes reasonable judgments quickly and adjusts thinking to assimilate new information.

- Desirable:

- o Experience in working within the consumer goods or retail industry.
- o Professional certification (Agile methodologies, PMI, ITIL, etc.)

Key Interfaces:

- Internal
 - Technical architects, DevOps teams, Data SMEs, UAT team, User engagement managers
 - Data & Analytics team.

At HUL, we believe that every individual irrespective of their race, colour, religion, gender, sexual orientation, gender identity or expression, age, nationality, caste, disability or marital status can bring their purpose to life. So apply to us, to unleash your curiosity, challenge ideas and disrupt processes; use your energy to make the world a better place. As you work to make a real impact on the business and the world, we'll work to help you become a better you!
