

JOB TITLE: Assistant Manager, Data Analyst

LOCATION: UniOps Bangalore

ABOUT UNILEVER:

Be part of the world's most successful, purpose-led business. Work with brands that are well-loved around the world, that improve the lives of our consumers and the communities around us. We promote innovation, big and small, to make our business win and grow; and we believe in business as a whole for good. Unleash your curiosity, encounter ideas and disrupt processes; use your energy to make this happen. Our brilliant business heads and colleagues provide mentorship and inspiration, so you can be at your best. Every day, nine out of ten Indian households use our products to feel good, look good and get more out of life - giving us a unique opportunity to build a brighter future.

Every person here can bring their purpose to life through their work. Join us and you'll be surrounded by inspiring heads and supportive peers. Among them, you'll channel your purpose, bring fresh ideas to the table, and simply be you. As you work to make a real impact on the business and the world, we'll work to help you become a better you.

ABOUT UNIOPS:

Unilever Operations (UniOps) is the global technology and operations engine of Unilever offering business services, technology, and enterprise solutions. UniOps serves over 190 locations and through a network of specialized service lines and partners delivers insights and innovations, user experiences and end-to-end seamless delivery making Unilever Purpose Led and Future Fit.

MAIN JOB PURPOSE:

This is an exciting opportunity to be a part of Data & Analytics, Data Centre of Excellence. This role is tasked to deliver the data foundations needed to deliver maximum value from data to drive business and organisational performance for Analytical products.

Define, execute, and embed the data and analytics strategy, delivering the data platform foundations needed to fuel our analytical products and deliver the democratisation of our data across the whole organisation. Defining and embedding a strong enterprise data governance and data quality programme within the Data Lake to properly govern our internal, 2nd and 3rd party data assets and to ensure we have end to end quality from source to product. Partnering with our functions and analytical products to consulting and innovate on data components of products within a function / country / cluster: establishing data as a product, data as an enabler, then data as a service (and maybe eventually data as a business).

The position will be a Assistant Manager - Data Analyst responsible for partnering with analytical products, business groups and functions, to define and design specifications for the data platform. You will work with the Data COE Senior Manager to masterfully execute and collaborate with senior stakeholders to (i) drive cultural shift around data within the organisation; (ii) explore innovation opportunities around new data channels, new data feeds; (iii) identify interdependent activities and bias towards front-loading high impact work;
