

Job Title: Senior Executive - O365 Developer  
Location: Bangalore

#### ABOUT UNILEVER:

Be part of the world's most successful, purpose-led business. Work with brands that are well-loved around the world, that improve the lives of our consumers and the communities around us. We promote innovation, big and small, to make our business win and grow; and we believe in business as a force for good. Unleash your curiosity, challenge ideas and disrupt processes; use your energy to make this happen. Our brilliant business leaders and colleagues provide mentorship and inspiration, so you can be at your best. Every day, nine out of ten Indian households use our products to feel good, look good and get more out of life – giving us a unique opportunity to build a brighter future.

Every individual here can bring their purpose to life through their work. Join us and you'll be surrounded by inspiring leaders and supportive peers. Among them, you'll channel your purpose, bring fresh ideas to the table, and simply be you. As you work to make a real impact on the business and the world, we'll work to help you become a better you.

#### ABOUT UNIOPS:

Unilever Operations (UniOps) is the global technology and operations engine of Unilever offering business services, technology, and enterprise solutions. UniOps serves over 190 locations and through a network of specialized service lines and partners delivers insights and innovations, user experiences and end-to-end seamless delivery making Unilever Purpose Led and Future Fit.

Our culture is dynamic and collaborative - fostering innovation, expertise, and a strong sense of ownership. We act as enablers and evangelists for our business, empowering Unilever users to collaborate brilliantly and to enable our Connected 4 Growth strategy. We work with our Partners to ensure requirements envisioned by our users are converted to solutions to foster growth.

We are looking for an ambitious O365 developer to work with our partners and internal teams to deliver solutions aligned with Unilever's Collaboration platform strategy. The Collaboration Platform team is tasked to lead Unilever in to the new world of cloud collaboration and productivity, a key component in the Digital Employee Experience.

O365 Developer is part of the Solution and Capability – Application Platforms team of Collaboration Service line. The main purpose of this job is to deliver technical solutions and coordinate the demand from business and IT teams, work with internal team to deliver projects and transition projects to Application Maintenance team on Office 365 platform.

#### Job Description:

The Collaboration Services team is responsible for delivering innovation projects in the areas of Collaboration and Enabling technologies.

#### Key Responsibilities

Collaboration Platform team works closely with IT teams and Business teams to understand the requirements from various business units and delivers projects on O365 platform

As part of technical delivery team, you will have to

Analyze business requirements and deliver applications and solutions on O365 platform

Work with Internal team & L2 to ensure solutions are packaged and available in VSTS

Review requirements and propose OOTB solutions rather than building custom applications

Work with wider Collaboration team to scope out any required development work (where OOTB is not possible) and ensure it is fit for purpose.

Work with wider Unilever team such as InfoSec, IDAM, EC and other teams to ensure the delivered projects meet Unilever standards

Understand usage of Azure to deploy components on Azure

Keep abreast of latest rollouts by Microsoft across O365 products

Essential Experience, skills and qualification:

Deep knowledge and experience of building applications on O365. Need to know what to use when and OOTB functionalities. Primarily around SharePoint Online, OneDrive For Business, MS Teams, PowerApps, Flows.

Understanding of various OOTB functionalities of O365 workloads to propose solutions

Good knowledge of SharePoint modern sites and SharePoint Framework

Experience in management and coordination of teams

Knowledge on Agile and Scrum Methodologies

Knowledge on DevOps Model and ways of working

Usage of Azure DevOps for code management, build and release pipelines

Understanding of Azure platform and hosting WebApps and Webjobs

Knowledge on PowerShell Scripts, Migration tools

Educational Qualification:

B/B. Tech. or MCA/MSc-IT

Experience:

5-6 years of relevant experience

At HUL, we believe that every individual irrespective of their race, colour, religion, gender, sexual orientation, gender identity or expression, age, nationality, caste, disability or marital status can bring their purpose to life. So apply to us, to unleash your curiosity, challenge ideas and disrupt processes; use your energy to make the world a better place. As you work to make a real impact on the business and the world, we'll work to help you become a better you!
