Job Title : Senior Executive - Ecommerce Technology Job Location : Bangalore / Mumbai

ABOUT UNILEVER:
Be part of the world's most successful, purpose-led business. Work with brands that are well-loved around the world, that improve the lives of our consumers and the communities around us. We promote innovation, big and small, to make our business win and grow; and we believe in business as a force for good. Unleash your curiosity, challenge ideas and disrupt processes; use your energy to make this happen. Our brilliant business leaders and colleagues provide mentorship and inspiration, so you can be at your best. Every day, nine out of ten Indian households use our products to feel good, look good and get more out of life – giving us a unique opportunity to build a brighter future.

Every individual here can bring their purpose to life through their work. Join us and you'll be surrounded by inspiring leaders and supportive peers. Among them, you'll channel your purpose, bring fresh ideas to the table, and simply be you. As you work to make a real impact on the business and the world, we'll work to help you become a better you.

TEAM CONTEXT
You will be part of UniOps In-Market Technology team, working as a part of the Consumer Experience, partnering the growing Ecommerce Technology vertical, helping deliver across their tech and analytics requirements.

EXPECTED WORK
The role requires to deliver strategic and local/global IT solutions for end-to-end business goals and achieving the golden digital consumer journey. To ensure that the digital agenda for deliver program is landed well and is able to deliver the desired business value, the following aspects of technology management are of vital importance.

You will be responsible for scoping and delivering large projects end-to-end. Responsibilities include collection of business and systems requirements from internal and external customers, writing specifications, driving project schedules from design to release, and managing the production launch. You will lead and coordinate design/implementation efforts between internal teams and outside merchants and vendors to develop optimal solutions. The right candidate will possess a strong program management background, will have demonstrated experience leading medium to large projects, and will have a well-rounded technical background in current web technologies. You must be able to thrive and succeed in an entrepreneurial environment, and not be hindered by ambiguity or competing priorities. This means you are not only able to develop and drive high-level strategic initiatives, but can also roll up your sleeves, dig in and get the job done.
An ability to take large, complex projects and break them down into manageable pieces, develop functional specifications, then deliver them in a successful and timely manner is expected. Maturity, high judgment, negotiation skills, ability to influence, analytical talent and leadership are essential to success in this role.

EDUCATIONAL QUALIFICATIONS, EXPERIENCE & SKILLS
7+ years of relevant engineering experience
Experience managing projects across cross functional teams, building sustainable processes and coordinating release schedules
5+ years of technical program management experience
Ability to communicate effectively with both technical and non-technical individuals, with excellent oral and written skill.
Track record for being detail-oriented with a demonstrated ability to self-motivate and follow-through on projects
